

Billie Holiday was really fun! It was a 49 page graphic novel and a pretty quick read. It contained images from Billie's life, mostly about being a black woman in a racist country and her drug addiction. She often finds herself abused by sadistic whites. Meanwhile modern day Sinner (Sampayo/Munoz main protagonist detective) reminisces about the few times that he actually met this legendary jazz singer. It's a good narrative, but the art really makes it awesome! Check out these pages of her time making movies in Hollywood. I always loved the look of Munoz's art. It's wild and messy while at the same time very strong and firm. He can draw faces that look like they belong in a 1930s Felix the Cat cartoon and yet fit into this gritty realistic world. He really knows how to compose a picture and his backgrounds are often awesome while keeping his main characters pretty loose and expressive. I've seen many really great comic artists since my introduction to Munoz but I still find his work some of the most exciting comics ever made
