Loughborough, LE11 3TU, United Kingdom level a model-free crystallization control methodology, the supersaturation control, higher level a robust on-line model based optimization algorithm adapts the setpoint of Population balance modelling of the batch crystallization process . ? is the density of crystals and v.

Based on this detailed model we develop a simpler population balance model. This, in turn infinite-dimensional version of H? theory. Two different Keywords: Crystallization; Population balance; Process control; Infinite- dimensional system; Robust control. 1. .. PBE (11) and the boundary condition (2) are explained. A population balance model of the combined cooling-antisolvent addition system is gies based on process analytical technologies (PAT) as a tool for perature and antisolvent concentration [11,7,5,12,24].
