

This epic novel, the detailed accounts of the life and times of the world conqueror Genghis Khan, marks the first thorough documentation of the early part of his life, areas which were never recorded but have been fleshed out using fictionalized elements drawn from massive intercontinental research. This fascinating story about a man who is considered to be the greatest man during the last one thousand years by many people is very readable for both general readers and experts, and will make readers feel like contemporary witnesses.
