

Crash Course is the revision series, all medical students have been waiting for! This superb new series of revision books are bright, colourful, and easy to use learning tools every student will want to have. Crash Course has been written by students, for students, which ensures they are ideal for today's curriculum. Colourful and fun illustrations that simplify difficult concepts are combined with concise bulleted text to set this remarkable series apart from any other. This comprehensive group of revision books is pitched squarely at the more modern, integrated curriculum. Many of the titles are systems rather than discipline based. For example, the Gastrointestinal System covers aspects of anatomy, physiology and biochemistry of that system therefore teaching the student the basic sciences within a clinical setting. Meeting the requirements of the change in curriculum in medical schools throughout the country, Crash Course is the first review series to fully integrate the basic sciences with clinical information.
