

Modern North American sturgeons and paddlefish are the result of 100 million years of evolution. Once an integral part of aboriginal culture, their numbers were decimated by overfishing and habitat destruction during the past two centuries. This book details the extensive science aimed at helping these remarkable species recover from the brink of extinction, and describes the historical, biological, and ecological importance of North American sturgeon and paddlefish. The text is enhanced by photographs and detailed line drawings. This comprehensive volume will be an invaluable resource for researchers, educators, and consultants, in academic and government settings, who work to further scientific understanding of these fishes. No other single compilation has documented current information in such detail.

The Hedgerow Cookbook: 100 delicious recipes for wild food, The Encyclopedia of Animal Ecology (The Encyclopedia of Animal Series), Matcha (French Edition), Dementia Heroes: Techniques to Gain Cooperation from the Adult with Dementia, Yoga for Men in 5 Minutes, Virgin and the Nightingale, Cartes Taride Pour Cyclistes Et Automobilistes (16 large folding linen backed maps of France, Italy, Belgium and Austria/Germany), Freedom and Order in a Liberal Society (E.Rathbone Memorial Lecture), Tallys Corner: Les Noirs du coin de la rue (Le sens social) (French Edition),
